

SAFTIDOOR

The Saftidor is a cost effective powder coated steel retractable grill system. The Saftidor is modular and suitable for all opening widths and for heights up to 2500mm. The product lends itself to all applications where aesthetics are a consideration and clear access to the area being secured is required. Saftidor is ideal for the protection of shopfronts, entrance doors and counter barriers in restaurants and bars. The design of the grill system permits the door to retract to within 15% of its opening size and the hinging system means the grill can be swung away from the opening. The addition of a trolley system makes the Saftidor mobile, and it can be used as a pedestrian barrier in shopping and events centers schools, airports or any application where restricted access maybe required from time to time. The product is available within 24 hours and comes in either a white or a black powder coated finish. A variety of locking options allows the product to utilized in anumber of security applications.
